

Performance Summary

Provider Name: CHILDRESS REG MC

Medicare Provider Number: 450369

Location: CHILDRESS, TX 79201

INDEX RANK

The **Hospital Strength Index™** is a broad performance scorecard based on publicly available data. The tables below present this facility's Overall Rank and Ratings in three categories: Risk, Value, and Performance. The overall score and three category scores are based on performance in the nine pillars detailed in the second table. Rankings are based on percentile scores compared to all U.S. hospitals in the study database. Additional details on methodology and data sources are included below and at iVantageINDEX.com.

QUARTILE RATING SCALE

RISK

PERCENTILE RANK 88.5

| Inpatient Market Share | Outpatient Market Share | Population Risk |
|------------------------|-------------------------|-----------------|
| 70.0 | 83.3 | |

VALUE

PERCENTILE RANK 91.7

| Cost | Charge | Quality | Outcomes | Patient Perspectives |
|------|--------|---------|----------|----------------------|
| 34.6 | 65.7 | 97.8 | 70.4 | 80.5 |

PERFORMANCE

PERCENTILE RANK 83.9

| Financial Stability |
|---------------------|
| 83.9 |

*Note: Hospitals with missing scores had data suppressed by CMS.
 Note: Hospitals with * by their scores did not report any data.*

The **Hospital Strength Index™** provides a comprehensive framework to compare hospital performance based on publicly available data. The INDEX includes a single, overall performance rating, three category composite scores and nine pillar domain scores.

| PILLAR | DESCRIPTION | DATA SOURCE | SCORE INTERPRETATION |
|-------------------------|---|--|---|
| Hospital Strength Index | Overall hospital performance based on the aggregate scores of the ten domain pillars | Hospital Strength Index | High scores reflect your facility's overall strength compared to your peers |
| Inpatient Market Share | Inpatient market rank based on your facility's Herfindahl-Hirschman Index (HHI) score | Medicare Service Area | Higher scores reflect your facility's inpatient market rank compared to your peers |
| Outpatient Market Share | A roll-up of your facility's outpatient market rank across 4 major service line categories | Standard Analytical File | Higher scores reflect your facility's outpatient market rank compared to your peers |
| Population Risk | Market profile based on health status indicators and per beneficiary costs | ACO Shared Savings data, Robert Wood Johnson Foundation, Medicare Service Area | Higher scores reflect better health status and lower population-based costs for your facility's market |
| Cost | Hospital performance based on Medicare Inpatient and Outpatient costs | MedPAR, Medicare Outpatient Standard Analytical File | Higher scores reflect lower average inpatient and outpatient costs (efficiency) |
| Charge | Hospital performance based on Medicare Inpatient and Outpatient charges | MedPAR, Medicare Outpatient Standard Analytical File | Higher scores reflect lower average inpatient and outpatient charges (affordability) |
| Quality | Hospital performance on CMS Process of Care Measures | Hospital Compare | Higher scores reflect better overall clinical performance against national standards |
| Outcomes | Hospital performance on Outcomes of Care, AHRQ, PSI and Medicare Inpatient mortality measures | MedPAR, Proprietary Mortality Models, Hospital Compare | Higher scores reflect better overall clinical outcomes based on mortality, readmission and patient safety rates |
| Patient Perspectives | Hospital performance on HCAHPS measure | HCAHPS | Higher scores reflect better overall patient satisfaction |
| Financial Stability | Hospital performance on select balance sheet and income statement ratios. | CMS Hospital Cost Report Information Systems (HCRIS) | Higher scores reflect stronger financial stability and performance |
